The program is part of the statewide California Climate Investments Initiative to reduce greenhouse gas emissions while serving communities that need it most. These investments are funded by the Greenhouse Gas (GHG) Reduction Fund using proceeds from the state's cap-and-trade auctions. Cap-and-trade is a market-based regulation that is designed to reduce GHGs from multiple sources.

Grant recipients will be available to talk about benefits, including financial savings and reduced air pollution in their neighborhoods. [Click here](#) to sign up to attend the Nov. 3<sup>rd</sup> press conference. #DrivingClean
